

On Demand Labels

The ISG's on demand label system saves time and money while ensuring patient safety

Patient labels are a vital part of healthcare and must be accurate and legible. However, sheets of labels are expensive to print and result in waste. Excess printed labels must be destroyed. The cost for sheets of labels and associated toner is high. An option to reduce wasted labels is thermal printers, but employees must login to their computer workstations, select a patient, select a printer, and then print. This can be a continually arduous process simply to print individual labels everyday.

The ISG™ On Demand Label system solves these problems. Simply scan the patient chart label to instantly print one or more labels. The chart label, printed in registration, contains a 2D barcode with all the patient information. on each label. A time/date/location stamp can be printed on each.

ISG On Demand Labels 20220210

Key Features

- Current, accurate labels on demand
- Saves from wasted labels, ink and money
- Fast and easy to use

About the ISG

The Identification Systems Group (ISG) is a nationwide network of local experts in identification, security, tracking and card personalization technologies, providing high quality, cost-effective solutions backed by local support and the strength of our Professional Services Certification program. Each member company works together to provide seamless support and collaboration in the identification and issuance industries across the USA and Canada.
