NEW TECHNOLOGY IS CHALLENGING DATA SECURITY

In our world of ever changing technology, digital devices such as Smartphones, Mini-tablets and SSD Drives are essential in daily lives for all of us and especially in the work place.

These devices are not only used for data storage, they are now at the center of communication for the world. E-mails are written, photos are taken, and documents are edited.

Do we know where these devices end up once they become outdated and are discarded for new faster technology? The special functionality of flash- memory in devices, simple deleting or overwriting of data is nearly impossible.

In addition to Data Security Laws globally, it is typically the responsibility of each company to protect their intellectual property against unauthorized individuals. So how these devices are taken out circulation is key in safeguarding sensitive information.

50 JAHRE ERFAHRUNG
IN DATENSCHUTZ

Intimus International has over fifty years experience of developing and manufacturing products that address the destruction and sanitization of media containing sensitive information. Intimus introduced the first paper shredder to be used in the office environment many years ago. And now intimus develops and introduces the first office environment multimedia digital destroyer, FlashEx!

DESTRUCTION OF FLASH MEDIA
AT THE WORKPLACE
FlashEx

This unique product only requires standard power, unlike industrial shredders that need special power requirements, dedicated areas in your facility because of noise and dust. Our FlashEx is "plug and play "and can be used anywhere in the work place.

The intimus FlashEx is the only safe and reliable way to protect and destroy your sensitive multimedia and digital formats in the workplace in real time, not having to store it for pick up, increasing the potential for data theft. Call us today for more details on this product and let us share our complete product portfolio with you on our complete line of information destruction devices

The FlashEx has a specially designed solid cutting head which grabs the material with specially designed claw like cutting cylinders pulling material into the unit. It automatically reverses itself on thicker material until the item is totally destroyed to 4X15mm end waste particle. The FlashEx has incorporated an Auto Safety feed opening, keeping the operator safe but still able to watch the destruction through the viewing window. The i-control operation unit is guaranteeing an easy-to-use machine and provides full control to the operator.
